Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 3-5 remain rejected under 35 U.S.C. 102(e) as being anticipated by Bonninque. In regard to claim 1, Bonningue discloses a sliding piston opening means comprised of a length of tube 9 with one or more openings (between legs 16, 17 and 18) through part of the length, a sliding piston 21 having a sealing diameter approximately equal to the inside diameter of tube 9 and disposed therein and movable between from a first closed position to a second open position “next to the openings” and a compressible tubular housing 6 having a sealed end and an open end and having an inside diameter (at section 5) approximately equal to the outside diameter of the tube and a fluid P between the sealed end of the housing and the piston whereby when the housing is squeezed, the liquid will be dispensed as claimed (see Figures 3A-3C). In regard to claim 3, the openings in the tube are defined by slits through a portion of the length of the tube. In regard to claim 4, the housing has an end that is covered by an “applicator” 7. In regard to claim 5, the length of tube and the housing are formed as a

"single unit" wherein the length of the tube is in the form of a reduced diameter within the housing.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 2/13/06 have been fully considered but they are not persuasive. The Applicant contends that the Bonningue reference is not applicable against the claims in that when the piston is in a second open position, it is not next to the openings. The piston in the Bonningue reference, however, is considered to be "next to" the openings in both the open and closed positions, i.e., the limitation "next to" does not have a special definition in the claims (or the specification) and thereby the Examiner may interpret this limitation broadly. Figures 3A through 3D of Bonningue show the piston in various positions (including "open" and "closed" positions) and all of these positions are considered to be "next to" the openings. For example, even when the top of the piston is spaced from the bottom of the openings (Figure 3C), the piston can still be considered "next to" the openings.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
